

# RECREATION AT HOME

## Handprint Bunnies

### Materials Needed:

- Construction paper (any colour)
- Pink marker
- Scissors
- Pen/pencils

### Instructions:

1. Start by tracing your own hand - when doing this draw loosely around each finger to make each "finger" wider than your natural finger size.
2. Cut out your hand - when doing this make sure you cut a "v" at the bottom of each finger inside of a curve.
3. Cut a small slit between the pinky finger and the ring finger so the slit is in line with the thumb.
4. Fold down the baby finger towards the centre to make one of the bunny arms.
5. Fold the thumb down towards the centre to make the other bunny arm.
6. Cut off the middle finger so that you are left with two "bunny ears".
7. Then use a pink marker (or any colour) to draw the pink parts of the ears and an oval for the nose.
8. Using a black marker or pen, draw the rest of the face - whiskers, eyes and nose.
9. Draw two little paws at the bottom of the handprint to make the bunny's feet.
