Notice to Residents Cockburn Subdivision Watermain Improvements

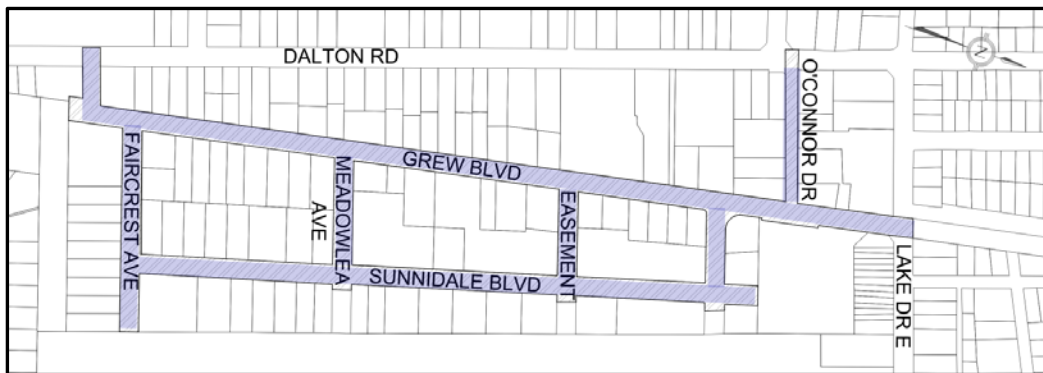

Dear Resident(s),

As part of the Cockburn Subdivision Watermain Improvement project, the Town of Georgina together with their engineering consultant TYLin, began the project with field investigations in Spring 2022 with the intent to complete the design in Fall 2022 and commence construction shortly thereafter.

The initial field investigations uncovered additional work that was required in order to properly design the watermain improvements. The additional work and investigation extended the design schedule of the project.

The updated timeline for completion of the design of the project is late Fall 2022 followed by the commencement of construction in early 2023. A Public Information Centre (PIC) will be held in late 2022 to provide residents and the public more information on the design of the project and updated construction timelines moving forward.

Project study area shaded below:

Thank you for your patience while we complete the design phase of the project. If you have questions about the upcoming work, please contact the Town's Project Manager at the number below or visit [georgina.ca/CockburnWatermain](https://www.georgina.ca/CockburnWatermain).
