### Fire and Rescue Services Carbon monoxide safety

Carbon monoxide is known as the silent killer because it is a colourless, tasteless and odourless gas that can be deadly. If your house has a fuel-burning appliance, a fireplace or an attached garage, you must have a working CO alarm outside of each sleeping area. Many appliances in our homes can produce carbon monoxide such as the hot water tank, furnace, natural gas oven/range to name a few. Get your fuel-fired appliances and vents inspected annually by a qualified technician. To learn more, visit [georgina.ca/fire](http://georgina.ca/fire).
