### Old Shiloh Bridge Assessment Municipal Class Environmental Assessment Study Notice of study commencement

#### Background

The Town of Georgina has retained Tatham Engineering Limited to complete a Municipal Class Environmental Assessment (Class EA Study) under the Environmental Assessment Act (R.S.O. 1990, c. E.18) to determine the preferred method of improvement to Old Shiloh Bridge East. The goal is to determine the recommended alternative for the future of the structure and alternatives for the water crossing at Old Shiloh Road. The bridge is located on Old Shiloh Road approximately 750 m west of Victoria Road, in the Hamlet of Udora.

#### Study Process

This study is being completed as a Schedule 'B' project as outlined in the Municipal Engineers Association Municipal Class Environmental Assessment document. The Class EA Study will address the following:

- The ability to convey water flow at the bridge.
- The location, extent and sensitivity of the existing environments within the area.
- Alternative solutions to address the bridge needs.
- Potential impacts of each alternative to the noted environments and possible mitigation measures.
- Public and agency consultation and participation.
- An assessment and evaluation of the alternatives culminating in a preferred solution.

#### Consultation

Members of the public, agencies, Indigenous communities and other interested persons are encouraged to actively participate in the planning of this study by contacting staff directly with information, comments or questions. There will be a Public Information Centre (PIC) at a later date once further information is available. Details regarding the date and format of the PIC will be forwarded to those on the project mailing list, and posted on the Town's website at [georgina.ca/OldShilohBridge](http://georgina.ca/OldShilohBridge)

#### Project Contacts

If you would like to be added to or removed from our project mailing list or have project-related questions, contact the Town and/or consultant as noted below:
