Subject: Notice of Upcoming Land Survey Work

Dear resident/homeowner:

This notice advises that a survey crew from JD Barnes Limited will need access to the front yard of your property to conduct a topographic survey of the existing grade conditions. This survey information is required to facilitate upcoming road reconstruction works along The Queensway North (from Old Homestead Road south approximately 590 metres).

This road reconstruction is related to an approved Ballymore Homes development of a residential subdivision on the east side of The Queensway North, approximately 300 metres southeast of Old Homestead Road.

Kindly ensure that front yard access is available. JD Barnes staff will be driving a white vehicle marked with the company name and will knock on your door to identify themselves to you before entering the property.

The initial fieldwork stages for this will begin shortly with additional topographical survey information being obtained from an Ontario Land Surveyor within the front yards of residents along The Queensway North. We kindly ask you to review the notice of upcoming land survey work to allow the Ontario Land Surveyor to enter your front yard to complete the surveying work.

If you have any survey related questions, contact:
Michael Gorman, JD Barnes Limited at 905-477-3600, ext. 238

If you have any engineering related questions, contact:
Adam Zahorchak, Sabourin Kimble & Associates Ltd at 905-426-9451, ext. 266

Sincerely,

Saleem Sial, P.Eng.
