

THE TOWN OF GEORGINA
AGRICULTURAL ADVISORY COMMITTEE
AGENDA

Thursday, April 27, 2017
7:15 PM
Council Chambers

1. CALL TO ORDER
2. ROLL CALL
3. INTRODUCTION OF ADDENDUM ITEMS
4. APPROVAL OF AGENDA
5. DECLARATIONS OF PECUNIARY INTEREST AND GENERAL NATURE THEREOF
6. ADOPTION OF MINUTES
 - (1) Pages 1 - 4
Meeting minutes from March 23, 2017.
7. DELEGATIONS/SPEAKERS
8. PRESENTATIONS
 - (1) Canada 150 Celebrations
9. CONSIDERATION OF REPORTS ON THE AGENDA

- Pages 5 - 10**
- (1) 5th Report to Council DS-2017-0038 – Connect to Innovate funding application
 - (2) Livestock Kills report, if available.

10. COMMUNICATIONS

- Page 11 - 15**
- (1) Scugog Broadband Strategy
- Page 16 - 18**
- (2) November 11, 2015 Council Resolution – Purchasing Share the Road Signs
- Page 19 - 20**
- (3) Toronto residents raise concerns over coyotes
- Pages 21 - 22**
- (4) Celebrating 40 Years of Foodland Ontario

11. OTHER BUSINESS

- Pages 23 - 57**
- (1) OWDCP Municipal training session - follow up from Teri Frankland, Licensing Coordinator

12. CLOSED SESSION, IF REQUIRED

13. MOTION TO ADJOURN

Next Meeting: May 26, 2017

THE TOWN OF GEORGINA
AGRICULTURAL ADVISORY COMMITTEE
MINUTES

Thursday, March 23, 2017
7:15 PM
Council Chambers

1. CALL TO ORDER

The meeting was called to order at 7:16 PM

2. ROLL CALL

The following Committee members were present:

Brad Smockum, Chair

Bart Johnson, Vice Chair

Councillor Dave Harding (arrived at 7:28)

Brenda Rae

Linda Harrison

Glenda Hamilton

James (Jim) Lockie (arrived at 7:25, departed at 8:28)

The following staff member was in attendance:

Teri Frankland, Licensing Coordinator

Sarah Brislin, Committee Services Coordinator

3. INTRODUCTION OF ADDENDUM ITEMS - *None*

4. APPROVAL OF AGENDA

Moved by Linda Harrison, Seconded by Bart Johnson

RESOLUTION NO. GAgAC-2017-0014

That the Georgina Agricultural Advisory Committee approve the March 23, 2017, agenda.

Carried.

5. DECLARATIONS OF PECUNIARY INTEREST AND GENERAL NATURE THEREOF – *None*

6. ADOPTION OF MINUTES

(1) Meeting minutes from February 23, 2017.

Moved by Linda Harrison, Seconded by Brenda Rae,

RESOLUTION NO. GAgAC-2017-0015

That the Georgina Agricultural Advisory Committee minutes of February 23, 2017, meeting be adopted.

Carried.

7. DELEGATIONS/SPEAKERS - None

8. PRESENTATIONS

(1) Teri Frankland, presentation on livestock kill regulations

Teri Frankland reviewed the changes and distributed livestock claim guidelines and program information.

Moved by Glenda Hamilton, Seconded by Brenda Rae,

RESOLUTION NO. GAgAC-2017-0016

That the Georgina Agricultural Advisory Committee receive the presentation on livestock kill regulation changes given by Teri Hardy.

Carried.

9. CONSIDERATION OF REPORTS ON THE AGENDA

(1) Livestock Kills report – *None*

10. COMMUNICATIONS

(1) Livestock claims from East Gwillimbury, Uxbridge, and Brock.

(2) Changes Coming to the Ontario Wildlife Damage Compensation Program, article (deferred from the previous meeting).

Moved by Glenda Hamilton, Seconded by Jim Lockie

RESOLUTION NO. GAgAC-2017-0017

That the Georgina Agricultural Advisory Committee receive the following Communication items:

1. Livestock Claims from East Gwillimbury, Uxbridge, and Brock.
2. Changes Coming to the Ontario Wildlife Damage Compensation Program.

Carried.

11. OTHER BUSINESS

- (1) Farm Fresh Map, review.

The Committee suggested there may be a farm on Durham 23 that has not been included.

- (2) Survey of rural residents for high speed internet

Moved by Bart Johnson, Seconded by Brenda Rae,

RESOLUTION NO. GAgAC-2017-0018

That the Georgina Agricultural Advisory Committee receive the following Other Buisness items:

1. Farm Fresh Map, review.
2. Survey of rural residents for high speed internet.

Carried.

12. CLOSED SESSION, IF REQUIRED - *None*

13. MOTION TO ADJOURN

Next Meeting: April 27, 2017

Moved by Brenda Rae, Seconded by Linda Harrison

RESOLUTION NO. GAgAC-2017-0019

That the Georgina Agricultural Advisory Committee March 23, 2017, meeting be adjourned at 9:03 PM.

Carried.

Brad Smockum, Chair

C. Sarah A. Brislin
Committee Services
Coordinator

THE CORPORATION OF THE TOWN OF GEORGINA**REPORT NO. DS-2017-0038****FOR THE CONSIDERATION OF
COUNCIL
APRIL 05, 2017****SUBJECT: CONNECT TO INNOVATE FUNDING APPLICATION TO BE
SUBMITTED BY THE REGIONAL MUNICIPALITY OF YORK**

1. RECOMMENDATION:

1. That Council receive Report No. DS-2017-0038 prepared by the Economic Development and Tourism Division, Development Services Department dated April 5, 2017 respecting the Connect to Innovate funding application to be submitted by the Regional Municipality of York.
2. That Council support the application to the Connect to Innovate Fund being submitted by the Regional Municipality of York.
3. That Council authorize a tax levy budget allocation of \$30,000 per year for each of 2018, 2019, and 2020, for the purpose of leveraging additional funds from the Connect to Innovate Fund to support additional upgrades and additions to the Town's wireless broadband infrastructure to service certain households and businesses in those areas identified as partially serviced based on the survey completed.
4. That a copy of Council's resolution and Report DS-2017-0038 be forwarded to the Regional Municipality of York's Strategic Economic Initiatives Division.

2. PURPOSE:

The purpose of this report is to request Council support of the Region's application to the Connect to Innovate Funding Program. And secondly, to also request that Council support a tax levy budget expenditure of \$20,000 per year for each of 2018, 2019, and 2020 to leverage additional funds from the Connect to Innovate fund to support additional wireless broadband coverage for the Town's residents and businesses.

3. BACKGROUND:

In December of 2016, the Canadian Radio-television and Telecommunications Commission (CRTC) declared broadband internet

access as a basic telecommunications service, similar to a landline telephone service. Coinciding with this announcement was the introduction of a new fund to support broadband infrastructure development. The Federal Government launched the new Connect to Innovate (CTI) Program on December 15, 2016 to help bring high-quality broadband connections to Canadians in rural and remote communities. The CTI Program is a \$500 million fund to be spent over 5 years with a focus on developing robust “backbone” infrastructure across underserved areas. Eligible recipients under the CTI program must be incorporated and operate internet infrastructure or have an entity that will build, own and operate the network.

The Program has identified two key areas within Georgina that may qualify for support. These are the areas of Brown Hill and Udora.

4. ANALYSIS:

Since the launch of the CTI program, staff from the Economic Development and Tourism Division, and the Information Technology Services Division have met with the Region of York and consultants from the telecommunications industry to review the opportunities for the Town and the Region to make application to the CTI program. Based on the two application criteria noted below, both the Region and the Town are eligible for funding.

- Georgina has the ability to make an application for last mile connections and to upgrade, enhance and maintain the Town’s existing wireless broadband infrastructure.
- York Region has the ability to make an application to fund ‘backbone infrastructure’ to service the Town’s rural areas and municipal facilities.

It has been determined that the greatest opportunity for success is to work collaboratively with the Region as the lead agency. The Town would support the Region’s application and also be able to leverage additional funds to upgrade, enhance and maintain the Town’s wireless broadband infrastructure.

York Region’s CTI application would focus on expanding the York Telecom Network (YTN) by laying new dark fibre infrastructure throughout four York Region municipalities, including: Georgina; East Gwillimbury; King; and, Whitchurch-Stouffville. The application would focus on these four municipalities as they have been recognized in the “Rural” zone of the CTI Program guidelines making them eligible for funding. The request for funding from the Town would ensure that the Town is able to make best use of the expanded YTN.

The YTN dark fibre network has been developed and managed by York Region for the last 15 years. The network has only focused on connecting municipal, university, school boards, and hospital (MUSH) sector facilities to date. A review of the network's governance structure and business plan has been underway for the last two years. This process has examined the opportunity of developing the network into a Region-owned optical fibre network which could offer access to the private sector. One of the criteria for CTI funding is that the network be 'open' to allow connections in a broad public spectrum (i.e. cannot be limited only to the MUSH sector).

Town Staff have met with Region staff to discuss the potential dark fibre route through Georgina to ensure that it would allow for the connection of Town facilities and, allow for further connectivity to local residents and businesses through internet service providers (ISP). The application proposes 175 kilometres of fibre reaching rural areas of York Region including a proposed fibre loop in Georgina that would connect Pefferlaw, Brown Hill and Udora to the existing York Telecom Network in addition to the extension of a fibre loop to connect the Region's Water Treatment Plant on Kennedy Road and properties in the vicinity of this route.

It is important to note that these proposed loops extend beyond the originally anticipated future path for the York Telecom Network into areas of the Region that would be difficult to service without leveraging infrastructure funding programs. The proposed expansion would facilitate service to thousands of potential customers in rural areas and almost double the YTN Network at a fraction of the typical cost.

Region Staff have developed a good relationship with local ISP's over the last few years. The ISP's would potentially connect onto the YTN dark fibre network to provide 'last mile' connections.

The Town's Economic Development Division has been collecting speed test data from Georgina residents and businesses to better understand the location of underserved areas in the municipality. This will help inform the Region's discussions with local ISP's and emphasize the need for improved internet service in Georgina.

On March 9, 2017 Regional Council was presented with a report and recommendations on the governance structure and business plan for the YTN, and also a second report on the CTI funding opportunity. Discussions at the meeting were positive and Council approved the recommendations for Region Staff to proceed with both the incorporation of a new YTN entity and the submission of an application to the CTI Program.

Notwithstanding the desire, where feasible, to provide fibre to every address, wireless and satellite solutions are still the only viable options for some

geographic locations within the Town. The Region has advised Town staff that the CTI application has the opportunity to request funds to upgrade wireless broadband infrastructure. Given that Udora and Brownhill have been identified as underserved, Georgina has the ability to leverage funds being allocated to upgrades and apply for additional funds to enhance wireless connectivity in a number of locations throughout Georgina and also make best use of the expanded YTN.

In this regard, staff are recommending that Council allocate \$90,000 over 3 years and leverage these funds to apply for additional funding that may be available through the CTI program.

5. NEED FOR PUBLIC CONSULTATION:

To improve our understanding of internet connectivity gaps throughout the municipality, residents and businesses were asked to complete an internet speed test survey. The survey information was shared on the Town's website, Social Media Networks, local newspaper, Economic Development newsletters, and direct mail to the Udora, Brown Hill and Pefferlaw areas.

The gathered information has been mapped and provided to the Region in support of the CTI program application.

6. RELATIONSHIP WITH CORPORATE STRATEGIC PLAN:

Corporate Strategic Plan:

Goal 1: "Grow Our Economy" - Action Item 1.8. "Leverage the efforts of York Region to explore opportunities to improve broadband connectivity and expand the York Telecom Network.

Economic Development Strategy:

Strategy 4: "Boost Investment Readiness" Action Item 4.4 indicates "Facilitate the expansion of High Speed Internet to businesses located in urban and rural areas of the Town. Activity 4.41 indicates "Support the expansion of the York technology Network (YTN) and other high-speed fibre connection.

7. FINANCIAL AND BUDGETARY IMPACT:

There are no direct financial implications associated with the Town supporting York Region's CTI Application. At this time the Region has estimated that the cost of extending the YTN fibre (175 km) would be 14 million dollars. The Region's investment would be \$6 million and is requesting that the balance be funded by the CTI program.

The program will provide up to 50 percent of eligible costs for all projects that propose backbone resiliency or capacity upgrades and partially served last-mile. In this regard, with an investment of \$90,000 we could leverage up to \$90,000 from the CTI program for the Town of Georgina.

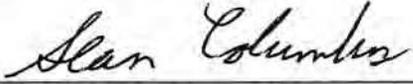

In order to take advantage of this funding opportunity staff are requesting that Council allocate a tax levy of \$30,000 per year over a period of 3 years to leverage additional funds through the CTI program for the purpose of enhancements, maintenance and additional dark fiber. If the grant is successful staff will need to consider the costs associated with utilizing the YTN.

8. CONCLUSION:

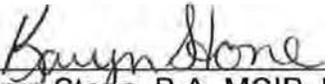

The Region of York and the consultant hired to prepare the application for the CTI funding program has indicated that a Council Resolution in support of the Region's CTI application is essential to the probability of a successful application. Connectivity is essential to the development and sustainability of healthy vibrant complete & intelligent communities. It is critical that Council support the ongoing efforts of York Region and the ultimate goal of providing fibre to every household and business.

This report has been drafted in consultation with the Director of Administrative Services & Treasurer, Rebecca Mathewson and the Manager of Information Technology Services, Shawn Conde.

GEORGINA

Wednesday, February 22, 2017

Slow Internet? We need your help to speed things up in Georgina!

Canada's telecom regulator (CRTC) recently declared that high-speed internet is now a basic service, just like a current landline. The issue in Georgina is that large pockets of land (mainly in rural areas) don't currently have access to high-speed internet. Some areas don't have access to the internet at all.

That's why we are participating with the Regional Municipality of York on trying to access federal grant money to build more high-speed internet infrastructure throughout York Region.

We need your help! Here's how you can assist us:

- 1) Take the Speed Test: speedtest.net

Press the "Begin Test" button and wait for the speed information to display. The display will show your upload and download rates. Once you obtain your results, please submit them in our Survey listed in Step 2.

Caution: *speedtest.net* is a third partied website. Only click the "Begin Test" icon. Please ignore any pop up ads, etc.

- 2) Submit your results and complete the Town's Survey: surveymonkey.com/r/BSSLSRP

If you do not have access to internet services at your home or business, we need to hear from you. Please leave us a message stating your name, address and that no internet service is available in your area by calling **Sean Columbus** at **905-476-4301 ext. 2330**.

The deadline to complete the survey or to provide your feedback is Friday, March 10.

The Town of Georgina is committed to protecting your privacy. We do not sell, rent or exchange any personal information supplied by you to any third party. Nor do we use any of the information you provide for direct marketing.

Township of Scugog Broadband Strategy

Prepared by: Actionable Intelligence Inc.
May 9, 2016.

Executive Summary

The Township of Scugog has undertaken an initiative to evaluate establishing an ISP to provide ultra high-speed broadband services to the citizens and businesses of the Township.

This document sets a starting point for the evaluation and consideration of ownership of a network and offering services to the Township. A cash flow model has been created which simulates a pilot project to jump-start the network. This model considers the costs and opportunity for revenue that pursuing a network could result in.

The strategy considers options to provide services across the Township with a staged delivery over time. Due to the large capital investment a phasing over time is necessary to spread out the debt and repayment.

The installation of a broadband network can help position the Township to move towards smart city services or opportunities to improve the monitoring of its government services and assets.

The network will also enable ultra broadband services to users to access new services and capabilities. If the Township can move quickly, they may also be one of a handful of areas in the GHTA to have ultra broadband services more widely available, which is beneficial in attracting new business and residents.

While the model of the pilot indicates a high level of investment of approximately \$1M from the Township, based on the forecast this amount could be repaid by 2031.

The strategy also positions the Township to consider opportunities for partnership that can assist in either offsetting some capital or driving a different return scenario.

Introduction

This report has been prepared for the Township of Scugog who are interested in establishing a broadband network and an ISP to operate that network. The Township had been assessing an opportunity to purchase an ISP with a government grant as a springboard into starting such a business. This relationship did not work out and the Township has decided to consider operating its own network.

This report details a strategy for the Township to build it's own network without purchasing an existing player.

The Township is considering this opportunity for two reasons – one is that it believes that broadband is a essential service for the 21st Century and second, as a service provider there is opportunity to generate a revenue stream to help the Township for the future.

The strategy considers a phased in plan to deliver services to the entire Township over time. Building networks is a large capital investment and it is necessary to consider that it takes time to both construct but also to collect revenue that is the base for generating the necessary capital to build a full network across the Township.

The best approach is to start in the densest area and then expand from there. Dense areas offer the opportunity to pass the most buildings/homes in a given distance and the best revenue potential due to higher number of customers.

The Township believes that in order to be a successful community in the 21st Century it needs to have access to Gigabit Internet services for businesses and eventually for the home. Evidence has indicated that this is becoming a benchmark for business in the 21st Century. Many cities in the United States and countries around the world have ultra high broadband (100Mbps or more to building/unit) or even Gigabit services. Many of these areas report consistent economic growth by standard measures. The Township desires to have a competitive advantage and believes that an ultra high-speed network can help provide an advantage to retain and attract businesses.

Need for Broadband

In the 21st Century communication networks will have an impact similar to that of paved highways in the 20th Century. Communication networks (broadband, internet etc.) enable information to travel at the speed of light, altering the means in which services are delivered and utilized.

Broadband Networks are a communications network capable of delivering multiple services at the same time including data, video, and music. These networks are transforming the way we work and live at a rapid pace.

Broadband networks have quickly become a minimum expectation for 21st Century businesses and residents. At the turn of the century many places were operating

with 1.5 Mbps download for the average business and 10 Mbps for very large businesses. Today, in 2016 the average household in Canada has a speed greater than 10 Mbps and the demand is growing exponentially every year.

With the large demand in growth, networks are turning to the use of fibre optics as the base infrastructure. However, there is not sufficient fibre in the existing networks to meet the demand. This results in a need to build more fibre infrastructure. With so much demand it is not possible to reach every location as quickly as is desired due to capital resource limitations. In addition, building networks requires a substantial amount of investment and this tends to be directed to the areas that offer the highest return or most competitive advantage. This can often result in other areas waiting a long period or not receiving networks at all.

“As noted by the OECD and the World Bank, the true benefits of broadband are expected to arise less from any direct impact but instead from the applications that broadband enables and the associated gains in productivity. While there are direct effects from investments in broadband technology and deployment of the infrastructure, the indirect effects arise from factors that drive growth, including innovation, efficiency and competition, as well as the facilitation of new and useful products, services, processes and business models that could not exist without broadband. According to the OECD, as broadband technology continues to improve and bandwidth increases, the capacity for broadband to act as an enabler of structural change in the economy expands due to its impact on an increasing number of sectors and activities.”¹

While there is confusion over broadband and what speeds qualify the fact is that very high-speed communication networks are an essential component to the future of businesses and communities. While many people believe they inherently understand the benefits of broadband infrastructure, demonstrating them and quantifying the outcomes has been more difficult. This is not unlike the need for roads in the early 20th century. In the United States there were multiple government initiatives (over decades) to assist in the funding of road construction and improvement and finally the Interstate system under Eisenhower in the 50s.

Broadband networks are a comparable endeavor for the 21st Century. While a more extensive and higher quality road network was directly related to economic benefit for towns, cities and countries so a more extensive, higher speed communications network will be the base for economic development and societal benefit of this century.

Many studies have been conducted in the past 15 years to put perspective on the contribution of broadband networks to economic development in communities and countries. This excerpt from the Broadband Strategies Handbook ² indicates a direct correlation to job growth:

“• Overall, an evaluation of multiple studies showed that, for every 1,000 additional broadband users, approximately 80 new jobs are created

¹ Module 1 – Broadband Strategies Handbook – world Bank 2013

² Broadband Strategies Handbook, World Bank, 2012, www.worldbank.org

- *In the United States, a nationwide study examined how broadband deployment affects job creation, determining that availability of broadband at the community level adds more than 1 percent to employment growth (Katz and Avila 2010)."*

This example demonstrates job growth, which is linked to economic prosperity.

Another study of two networks implemented in Europe also indicates positive job growth as well as productivity impacts.

"Four years after the start of the actnow programme, 10% additional yearly growth and 7% additional productivity increase per year in the business services sector can be observed in Cornwa

Memo

To: Georgina Town Council,
From: Sarah Brislin, Committee Services Coordinator
Date: 20/04/2017
Re: Adoption of Advisory Committee Resolutions.

1. Listed below are resolutions from recent 2015 meetings for which minutes have not yet been adopted by the Georgina Agricultural Advisory and Georgina Safe Street Committees. At these meetings the committees passed resolutions requesting council's endorsement of these time sensitive items.

The resolutions from un-adopted minutes are provided below.

(1) Georgina Agricultural Advisory Committee (GAgAC) October 17, 2015

RESOLUTION NO. GAgAC-2015-0031

That the Georgina Agricultural Advisory Committee (GAgAC):

1. Host a seminar in February or March 2016 on road safety relating to Agricultural vehicles.
2. That the committee investigate a partnership the Ontario Federation of Agriculture for the Road Safety Seminar
3. That staff draft a letter to be sent to Council requesting road safety signs that caution drivers to share the road with heavy agricultural equipment be purchased and posted strategically on rural roads.
4. That the Georgina Safe Streets Committee be asked to support the GAgAC's request to Council for "share the road" signs.

(See attached image for an example of share the road safety signs)

(2) Georgina Safe Streets Committee (GSSC) October 26, 2015

RESOLUTION NO. GSSC-2015-0028

That the Georgina Safe Streets Committee support the Agricultural Committee's request to Council to purchase agricultural "share the road" signs.

Carried

Thank you.

C. Sarah A. Brislin, BA
Committee Services Coordinator

Moved by Councillor Davison, Seconded by Councillor Fellini

RESOLUTION NO. C-2015-00776

That the verbal report provided by staff concerning Thane Developments Ltd. be received.

Carried.

13. DISPOSITIONS/PROCLAMATIONS, GENERAL INFORMATION ITEMS AND COMMITTEE OF ADJUSTMENT

(1) Dispositions/Proclamations

- (A) AIDS Committee of York Region requesting Council proclaim December 1st as 'World AIDS Day', participate in the social media campaign 'Red for Change: Wear It, Hold It, Show It" and participate in the vigil on Tuesday, December 1st.

Moved by Councillor Davison, Seconded by Councillor Neeson

RESOLUTION NO. C-2015-00777

That Town Council proclaim Tuesday, December 1st, 2015, as 'World AIDS Day' throughout the Town of Georgina and that information respecting the social media campaign 'Red for Change: Wear It, Hold It, Show It" and the Candlelight Vigil to commemorate World AIDS Day be posted on the Town website, with the organization's www.acyr.org website address.

Carried.

- (B) Memorandum from Sarah Brislin, Committee Services Coordinator, respecting resolutions from various Advisory Committees requiring Council's consideration.

Moved by Councillor Harding, Seconded by Councillor Fellini

RESOLUTION NO. C-2015-0778

That Town Council endorse the hosting of a seminar in February or March of 2016 by the Georgina Agricultural Advisory Committee on road safety relating to Agricultural vehicles, the investigation of a partnership with the Ontario Federation of Agriculture for the Road Safety Seminar, and the purchase and posting of 'share the road' signs that caution drivers to share the road with heavy agricultural equipment, and that the respective Advisory Committees be so advised.

Carried.

Toronto residents raise concerns over coyotes

Residents urge city to do more to stop people from feeding the wild animals.

Two dogs and a coyote check each other out in seemingly friendly curiosity. Video submitted by viewer who recorded the event in Toronto backyard on April 4, 2012. ()

By **ALICJA SIEKIERSKA** Staff Reporter
Mon., April 10, 2017

The city is urging residents to be on the lookout as it deals with coyotes in the community.

Experts from the city, the Ministry of Natural Resources and Forestry, and Coyote Watch Canada were on hand at an information session Monday evening to answer questions about how to deal with and co-exist with coyotes.

Several concerned residents at the session urged the city to do more about stopping people from feeding the wild animals, which encourages them to stay in certain areas.

Dawna Wightman was emotional as she recounted what happened to her two pets in October.

Wightman said her cat was attacked by a coyote in her yard near the Beach. A few days later, her dog was snatched by one right off the front porch and dragged to a den nearby.

“The problem is not with the coyotes,” said Wightman. “There’s a problem with people misconstruing what wildlife are. They are supposed to be kept wild.”

Coyotes continue to worry residents in Toronto with some calling on the city to do more to stop people from feeding the wild animals. (BERNARD WEIL / TORONTO STAR) | [ORDER THIS PHOTO](#)

Wightman decided to attend Monday's meeting, which drew about 80 people, because there have been no consequences against those who have been feeding the animals.

"There is no enforcement," she said.

The city said they are investigating incidents with coyotes, including snatches and bites this year, and are relying on residents to inform them of when people are leaving food out.

"We really hope this helps people open their eyes to how coyotes fit in our environment and how we need to co-exist with them," said Elizabeth Glibbery, manager of Toronto Animal Services.

"We do have some work to do about how to deal with people feeding animals, we know that. But we hope people have a better understanding now of how coyotes fit in their community."

Brent Patterson, a research scientist with the Ministry of Natural Resources and Forestry, said while coyotes are predators and potentially dangerous, the risk of conflict or harm is relatively low.

"Most of the conflict involving coyotes is preventable," he said. "They're not going anywhere, so finding ways to co-exist and minimize conflict is in everyone's best interest."

All experts at the session urged residents never to feed coyotes, which can create problems for the entire neighbourhood and is also against city bylaws.

Residents can help keep coyotes away by avoiding feeding pets outdoors, removing bird feeders, and taking garbage out on the morning of pickup, instead of the evening before.

Removing any food temptation is key, Patterson said. He pointed to one incident in Mississauga, where a coyote made the area surrounding a fire hall its home because grease was being dumped nearby.

Residents were also advised to keep dogs on a short leash.

The city says it will host more information sessions in the future.

Subject: Celebrating 40 Years of Foodland Ontario

News Release

Celebrating 40 Years of Foodland Ontario

April 6, 2017

Buy Local, Boost the Economy and Enjoy the Good Things Grown in Ontario

For 40 years, Foodland Ontario has been making it easier for families and consumers to identify and enjoy Ontario's locally-grown and harvested foods. By buying local, you are helping boost the economy, create good jobs and strengthen Ontario's agri-food sector.

Jeff Leal, Minister of Agriculture, Food and Rural Affairs, was at Longo's grocery store today to mark [Foodland Ontario's](#) 40th anniversary and encourage customers to explore Ontario's 200 diverse, locally-grown foods.

Foodland Ontario helps connect Ontarians to local food while offering a range of nutritious recipes that make it easier to cook delicious meals using local ingredients. Over the years, Foodland Ontario has also partnered with thousands of Ontario producers, processors and retailers across the province to help consumers better identify Ontario foods in the marketplace.

You can help celebrate Foodland's 40th anniversary:

- **Celebrate local:** Check out 40 ways to celebrate local food by following Foodland Ontario on Instagram [@foodlandontario](#), Twitter [@FoodlandOnt](#) and [Facebook.com/FoodlandOntario](#).
- **Join the conversation online:** Post a picture of your favourite local foods and dishes using the hashtag #Foodland40 and #loveONTfood.
- **Buy local:** Explore the diverse variety of nutritious locally-grown food available in grocery stores and farmers' markets across the province. Make sure you look for the Foodland 40th anniversary logo in the aisles of your local food retailer.
- **Cook with local ingredients:** Check out Foodland Ontario's website or pick up a copy of the 2017 Foodland Ontario calendar to enjoy globally-inspired [recipes](#) using local ingredients from countries such as India and Vietnam.

- **Ask for local:** The next time you are at a restaurant or grocery store, ask if they use local ingredients or look for a logo from a certified program like [Feast On](#).

Supporting Ontario's farmers and food processors is part of Ontario's plan to create jobs, grow the economy and help people in their everyday lives.

QUICK FACTS

- The Foodland Ontario program was launched by the government of Ontario in 1977.
- Foodland Ontario is part of the government's efforts to promote local food, which include:
 - Establishing a [Local Food Strategy](#) designed to accelerate growth in Ontario's agri-food sector by increasing consumer awareness and education, better access to local food and expanded local food production.
 - Investing more than \$180 million in initiatives and projects that help promote local food literacy and access.
 - Increasing market opportunities for local food by providing funding to Farmers' Markets Ontario to build capacity and expand farmers' markets across the province.
- Foodland Ontario is reaching more and more consumers through digital platforms and is active on five social media channels: Facebook, Twitter, Instagram, Pinterest and YouTube. In 2016, Foodland Ontario partnered with 120 events attracting more than a half million attendees.
- More than 90 per cent of grocery shoppers recognize Foodland Ontario's logo.

Hi Sarah,

I've included the email I received from OMAFRA relating to the meeting I attended with your committee. I hope these are some of what the members were looking for and please provide me feedback if they need additional information.

Thank you,
Teri

Subject: RE: OWDCP Municipal training session - follow up

Hi Teri,

Thank you for your inquiry regarding the Ontario Wildlife Damage Compensation Program (OWDCP). I have attached a copy of the Reasonable Care Plan that we require from applicants who apply 6 or more OWDCP applications to the program within one program year (January 1st – December 1st). This template is also currently posted on the program website (www.ontario.ca/predation).

Livestock and/or poultry damages are valued based on set Standardized Valuation Tables, which are updated and posted on our website monthly. Species type, age, and weight are considered when valuing livestock/ poultry. Owners can also submit required documentation in order to request available premiums (see the attached guidelines for further details).

With regard to the example you provided, where there is sufficient evidence that predation was the cause of death, a heifer that weighs 1,251 lbs and has all required registration documentation would receive the Fair Market Value (price per pound x weight) + the premium (50% of the calculated Fair Market Value). See below for a breakdown of the calculated value (based on [Ontario wildlife Damage Compensation Program: 2017C \(effective March 1, 2017\)](#))

$(\$1.46 \times 1,251\text{lbs}) = \1826.46 (fair market value)

$\$1826.46 \times 0.5 = \913.23 (50% of the fair market value)

$\$1,826.46 + \$913.23 = \$2,739.69$ (assigned compensation value)

***Note that OMAFRA is now responsible for assigning compensation, and payment should not be issued by Municipalities prior to receiving a "Municipal Report" containing all payment details.**

Please let me know if you have any further questions or concerns regarding this program.
Thank you,

Minoli Brandigampola

Project Analyst, Rural Programs Branch

Subject: RE: OWDCP Municipal training session - follow up

Hello,

I'm hoping you could help answer these inquiries, if not, could you please send me the individuals contact information who can assist?

I'm the Licensing Coordinator for the Town of Georgina and recently I sat in on the Agricultural Committee meeting, outlining the Wildlife Damage Compensation Program updates. Some of the committee members asked that I contact you to find information on the following topics:

- "Reasonable Care Plan" – can you provide information or the template that has been developed for owners to help them communicate prevention measures? As stated on page 3 of the Program Guidelines.
- Can you provide me with a breakdown of how the valuation works when determining the cost of a killed livestock? Example – a heifer (More than 1,250 lbs) is \$1.46, FMV x 50%. If the heifer is 1,251 lbs x1.46 = \$1,826.46 so would you divide that (913.23) and calculate both together to get value? Total price \$2,739.69. Is this the correct way to determine payout?

Thank you for your time.

Regards,

Teri Frankland

Subject: OWDCP Municipal training session - follow up

Thank you for attending the Ontario Wildlife Damage Compensation Program (OWDCP) Municipal training sessions. We have attached both presentations for your information. Please direct any additional questions regarding the program updates or upcoming Investigator training sessions to wildlife.damage@ontario.ca or 1-877-424-1300.

We have also developed a short survey to attain your feedback on the program updates and the effectiveness of the Municipal training sessions. Please follow the link below to provide your input:

<https://www.surveymonkey.com/r/ontariowildlifedamagecompensation>

We appreciate your feedback and look forward to our continued partnership.

Thank you,

Adam Meyer

Ontario Wildlife Damage Compensation Program

Program Guidelines

Version 1.2

Effective Date: January 1, 2017

These guidelines are subject to change from time to time. Consult the ministry's website at www.Ontario.ca/predation, or call the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) at 1-877-424-1300, to find more information about the Ontario Wildlife Damage Compensation Program and predation prevention resources. In the event of a conflict between these guidelines and the Order in Council (OIC) 502-2016, the OIC will prevail.

Ontario Wildlife Damage Compensation Program: Overview

The Ontario Wildlife Damage Compensation (OWDC) Program provides financial assistance to owners whose livestock, poultry and/or honey bees have been damaged or killed by wildlife.

The OWDCP is part of *Growing Forward 2 (GF2)*, a five-year, \$1.5 billion federal-provincial-territorial funding program launched in 2013. *GF2* supports our agri-food and agri-products sector by encouraging innovation, competitiveness and market development and, offering business risk management assistance.

OMAFRA undertook a review of the OWDC Program to ensure it was delivering services to owners in an effective and efficient manner. The changes being brought forward are the outcome of the review, and these changes will streamline delivery of the program and ensure owners receive compensation in a consistent and timely manner.

Program Changes – What’s New?

A Standardized Valuation Model for Compensation Consistency

OMAFRA is standardizing compensation rates that owners can receive for damage caused by predatory wildlife. OMAFRA will assign a fair market value (FMV) for livestock or poultry injured or killed by eligible wildlife. FMV is the average value an owner might receive for an animal with specific characteristics, such as age and weight.

A table of FMV, reflecting the different weights and classes of livestock and poultry, is publicly available on the ministry’s website and is updated regularly (www.Ontario.ca/predation). A process has also been established to determine premiums for bred or registered livestock and poultry.

The standardized valuation model and premiums will bring greater transparency and consistency to the program and will ensure that owners receive compensation that reflects the fair market value of their livestock and poultry.

Simplified Appeal Process

A new appeal process has been implemented to streamline and simplify owners’ requests for an appeal of their application. Details of the appeal process are set out in these guidelines.

Simplified Reimbursement Process for Municipalities

To streamline the reimbursement process for municipalities, the municipal application and program application have been combined. In cases where an appeal is not requested, municipalities will be notified of the assigned compensation value by OMAFRA within 20 business days after a decision letter is issued to the owner.

Subsequently, municipalities will receive reimbursement from OMAFRA.

Reasonable Care Plan

A reasonable care plan template has been developed for owners to help them communicate prevention measures they have employed and/or plan to employ. If an owner submits five applications within one calendar year (January 1 to December 31), that owner will be required to submit a completed plan in order to remain eligible under the program. Owners may submit a biosecurity plan in the place of a reasonable care plan so long as it incorporates a predator entry control component. The plan allows owners to detail the predation prevention measures currently

being employed as well as potential enhancements they plan to implement to reduce the likelihood of further incidents.

Program Responsibilities

Owner

Owners are responsible for:

- Demonstrating reasonable care of livestock, poultry, beehives, bee colonies and beehive-related equipment in relation to the prevention of predation.
- Notifying their municipality within 48 hours of discovering the injury or death of livestock or poultry, or discovering damage to beehives, a bee colony and/or beehive-related equipment.
 - If the incident occurs in a territory without municipal organization, the owner must notify OMAFRA (1-877-424-1300).
- Preserving the injury or kill site and carcass (or carcasses) until the municipal or territorial investigator has investigated and agrees it/they can be destroyed or disposed of, unless it contravenes the Ontario Regulation 106/09 of the *Nutrient Management Act, 2002*.
- Reviewing applications for accuracy and signing the application form prior to its submission.
- Disposing of all dead livestock and poultry in a manner that is acceptable under the Ontario Regulation 106/09 of the *Nutrient Management Act, 2002*.
- Submitting a completed reasonable care plan (see section called Reasonable Care) if an owner has submitted five applications to the program within one calendar year (January 1 to December 31) and intends to submit a subsequent application.

Investigator

The **municipal or territorial investigator** is responsible for:

- Carrying out a full and impartial investigation within 72 hours of receiving the notification of the injury or death of livestock or poultry.
- Taking three to six colour photos per eligible kill/injury incurred and collecting all necessary information to accurately complete the application.
- Municipal investigators are responsible for providing a completed program application to the owner and municipality within seven business days of completing an investigation.
- Territorial investigators are responsible for providing a completed program application to the owner and OMAFRA's program administrator within seven business days of completing an investigation, as well as any additional evidence from the owner.

The **bee investigator** is responsible for:

- Carrying out a full and impartial investigation with three business days of receiving notification of the damage to a beehive, bee colonies and/or beehive-related equipment.

- Providing a completed program application to the owner and OMAFRA's program administrator within seven business days of completing an investigation.

Municipalities

Municipalities are responsible for:

- Appointing municipal investigators.
- Reviewing and submitting completed applications and any additional evidence to OMAFRA's program administrator.
- Paying an owner's approved application, in accordance with the program guidelines and values assigned by the program administrator.
- Providing Statement of Farm Support Payments (AGR -1) to owners who receive compensation.
- Paying and reimbursing municipal investigators.

Ontario Ministry of Agriculture, Food and Rural Affairs

OMAFRA is responsible for:

- Administering the program.
- Appointing investigators for territories without a municipal organization.
- Posting the standardized pricing table containing the fair market values for all eligible livestock and poultry, and updating the table on a regular basis.
- Reviewing applications to determine eligibility and assigning values based on the evidence provided.
- Providing the owner with a written decision within 30 business days of receiving a complete application.
- Reviewing and assessing appeals.
- Reimbursing municipalities in accordance with the program guidelines.

Eligibility Criteria

Owner

To be eligible for the program, the owner must meet the following conditions:

- Be a person (includes a sole proprietor, corporation, partnership and unincorporated association).
- Be in compliance with and remain in compliance with all federal, provincial and municipal laws.
- Have a valid premises identification (PID) number for the farm property **where the damage or kill occurred** or a confirmation letter provided by the Indian Agriculture Program of Ontario (IAPO), or, for beehive, bee colony or beehive-related equipment damage, have a beekeeper ID registered under the *Bees Act*.

What is a premises identification (PID) number?

A PID number is a unique identifying number assigned to a parcel of land. It is free and quick to obtain a PID. Visit the following website if you need to obtain one (www.ontariopr.com) or call 1-855-697-7743. Most PIDs begin with "ON", then a seven-digit number.

- Have a valid Farm Business Registration Number (FBRN) or valid FBRN exemption.
 - A valid FBRN will be current as of the date of injury or death listed on the application, and it will also reference the owner's name (business or owner name) listed on the program application.

What is a Farm Business Registration Number?

This is a six-to-seven-digit number for a qualifying farm business. Farm businesses that declare gross farm incomes of \$7,000 or more (for income tax purposes) must register their farm business and pay the annual fee. A FBRN can be received by registering with Agricorp at 1-888-247-4999.

A valid FBRN exemption will:

- Be current as of the date of injury or death listed on the application.
- Reference the owner's name (business or owner name) listed on the program application
- Be one of the following:
 - Religious Exemption: requires a copy of the Religious Exemption Letter as provided by the Agriculture, Food and Rural Affairs Appeal Tribunal (AFRAAT).
 - Cultural Exemption for Indigenous producers: requires a letter from the Indian Agriculture Program of Ontario (IAPO) verifying the farm business operates in the First Nations community.
 - Gross Farm Income Exemption Certificate: granted by OMAFRA.
- Provide and demonstrate that reasonable care of livestock, poultry, beehives, bee colonies and beehive-related equipment has been taken in order to prevent predation.
- Ensure sufficient evidence is available in order to determine that predation was the cause of death/injury (see appendices C and D).
- Agree to fully cooperate with any audits related to compensation the owner receives under the program
- Be eligible to receive compensation.
- Agree to be bound by the requirements of the OIC and these program guidelines.

The Minister of Agriculture, Food and Rural Affairs may, on an annual basis, update the eligibility requirements and add further eligibility criteria.

Eligible Livestock Species

Alpaca	Lynx
Bison	Llama
Cattle	Marten
Deer	Mink
Donkey	Mule
Elk	Ostrich

Emu	Raccoon
Fox	Rabbit
Fisher	Rhea
Goat	Sheep
Horse	Swine

Eligible Poultry Species*

Bobwhite, northern	Partridge, gray (Hungarian)
Chicken	Pheasant, ring-necked
Duck	Ptarmigan, rock
Goose	Ptarmigan, willow
Grouse, ruffed	Turkey, wild
Grouse, spruce	Turkey
Grouse, sharp-tailed	

*The total weight of poultry injured or killed must be more than 25 kilograms (55 pounds) on a single application.

Eligible Wildlife Species for Damage to Livestock and Poultry

Bear	Hawk
Bobcat	Lynx
Cougar	Mink
Coyote	Raccoon
Crow	Raven
Eagle	Turkey vulture
Elk	Weasel
Fisher	Wolf
Fox	

Eligible Wildlife Species for Damage to Beehives, Bee Colonies and/or Beehive-related Equipment

Bear	Raccoon
Skunk	Deer

Eligible Damages

- Eligible livestock/poultry killed by an eligible predator.
- Veterinarian costs for eligible livestock/poultry injured by an eligible predator.
- Beehives, bee colonies and/or beehive-related equipment damaged by an eligible predator.

Disposal or Destruction: Your Responsibilities

Livestock or Poultry

The owner of the livestock or poultry cannot destroy, dispose of, or permit to be destroyed or disposed of, the carcass of any livestock or poultry reported killed until the municipal or territorial investigator has seen the carcass(es) and agrees that the carcass(es) can be destroyed or disposed of. The one exception to this rule is if the owner of the livestock or poultry is required to dispose of the livestock or poultry because of the requirements set out under Ontario Regulation 106/09 (Disposal of Dead Farm Animals), which states, "an operator may hold a dead farm animal following its death for up to seven (7) days for the purposes of a post-mortem activity." The owner of livestock or poultry shall comply with the requirements set out for the disposal of animals under Ontario Regulation 106/09 of the *Nutrient Management Act, 2002* at all times.

Where the municipal or territorial investigator is unable to complete a full investigation within seven days, the owner will need to dispose of the carcass(es). Given that the municipal or territorial investigator will not have an opportunity to see the carcass(es), the death will be attributed to wildlife provided that the owner has collected sufficient evidence to demonstrate that the death was caused by wildlife and that the carcass(es) was/were disposed of in accordance with Ontario Regulation 106/09. The owner is encouraged to take and submit colour photos of the carcass(es), the location where the carcass(es) was/were found and document all evidence indicating an attack occurred to ensure that the program administrator possesses sufficient evidence to evaluate the application.

For more information on deadstock disposal please consult the following website:

www.omafra.gov.on.ca/english/livestock/deadstock/.

Bee Colony, Beehive or Beehive-related Equipment

The owner of the beehive, bee colony or beehive-related equipment shall not destroy or dispose of, or permit to be destroyed or disposed of, the beehive, bee colony or beehive-related equipment reported damaged until the bee investigator has seen the beehive, bee colony or beehive-related equipment and agrees that it can be destroyed or disposed of.

Submitting an Application

For owner and investigator guidance through the application process, consult the following:

- Appendix A – Steps to Take If You Suspect Your Livestock or Poultry are Injured or Killed By Wildlife
- Appendix B – Steps to Take If You Suspect Your Bee Colonies, Beehives and/or Beehive-related Equipment Have Been Damaged By Wildlife
- Appendix C – Completing an Application for the Livestock or Poultry Owner
- Appendix D – Completing an Application for Beekeepers

The municipality or, in the case of an unorganized territory, the territorial investigator is responsible for completing the following tasks prior to submitting the application to the program administrator:

- Verify that the application is complete.
- Ensure that all required supporting documentation, including photographs, have been included.

- Check that the application has been signed by the municipal investigator, municipality and owner.
- If the owner indicated on the application that he or she wished to provide additional evidence, ensure this has been included in the submission.

Completed applications, including photos and supporting documentation, may be emailed to wildlife.damage@ontario.ca.

If possible, combine all attachments into a single PDF file. The maximum file size is 10 megabytes (MB) per email attachment. You can send multiple emails if necessary.

How Applications are Assessed

All applications received within the required timelines will be assessed by the program administrator against the following criteria:

- The owner meets all eligibility requirements.
- The application is complete:
 - If the application is incomplete or missing information, OMAFRA will contact the municipality, or territorial investigator in the case of territory without a municipal organization, to request that the information be provided within 15 business days.
 - If the information is not provided to OMAFRA within this period, the application will be deemed incomplete and declined.
- Livestock and/or poultry have been injured or killed by an eligible wildlife species or bee colonies, beehives and/or beehive-related equipment has been damaged by an eligible wildlife species.
- Total weight of poultry injured or killed on a single application is more than 25 kilograms (55 pounds).
- The livestock, poultry or bee colony were in good health prior to the predation event.
- There is sufficient evidence to demonstrate that the livestock, poultry or bee colony was killed or injured as a result of predation, not by disease, sickness or natural causes. Subsequently the injured animal, carcass or bee damage must be present and directly assessed by the investigator. One of the following must also be captured in the photographic and written evidence collected by the investigator:
 - i. Signs that livestock bled from the attack.
 - ii. Signs of tissue damage (bruising) under the lacerations and puncture wounds.
 - iii. Signs of a struggle, drag marks on the ground, broken vegetation and/ or blood around the site.
- Evidence must include complete descriptions and supporting photos of the killed/injured species (see appendices C and D).
- Damage was not caused by a dog.
- There is evidence that efforts at reasonable care have been and are being taken to prevent future incidences of predation (see appendices C and D).

If the application is deemed eligible and valid, OMAFRA will assign a value for the damages.

If the application is determined to be ineligible by the municipal or territorial investigator, or by OMAFRA, the application will be denied.

Assigning Compensation

A standardized valuation table will be used to assign a value to an application that has been found to be eligible for compensation. The tables are reviewed regularly and updated depending on the availability of new market data. The standardized valuation tables comprise industry-recognized market data (e.g., Statistics Canada and AgriStability sources).

Current standardized valuation tables as well as archived tables from past months can be found online at www.Ontario.ca/predation.

Determining Weaned and Not Weaned Livestock Values

For Weaned Beef and Dairy Calves

Compensation is determined using the indicated weight and standardized FMV.

For Young Calves (not weaned)

Beef calves are assumed to weigh 500 pounds at weaning age. Newborn calves and calves up to one month of age are to be compensated at 70 per cent of weaning value using the standardized valuation tables. The value increases by five per cent a month and reaches full value at seven months of age.

Age of Calf	Discount Multiplier (%)
0-1 Month	70
2 Months	75
3 Months	80
4 Months	85
5 Months	90
6 Months	95

For Weaned Lambs and Kids

Compensation is determined using the indicated weight and standardized FMV.

For Young Lambs and Kids (not weaned)

Newborn lambs and kids are valued at 45 per cent of the FMV. The value increases by five per cent a week and reaches full value at 12 weeks of age. The following table shows the per cent of full value for each week of age.

Age of Lamb or Goat Kid	Percentage of Full Value
1st week	45
2nd week	50
3rd week	55
4th week	60
5th week	65

6th week	70
7th week	75
8th week	80
9th week	85
10th week	90
11th week	95
12th week	100

Premiums

The program will pay premiums for agricultural livestock and poultry only when the required documentation can be provided by the owner. Premiums are calculated using an evidence-based approach with industry-recognized market data.

Registered Cattle, Sheep and Goats

Cattle

Registered purebred cattle will be compensated at one-and-a-half times the FMV set out in the standardized valuation tables, up to the maximum compensation value for registered cattle (see section Maximum Compensation Values in these program guidelines).

Required Documentation: The owner must provide registered purebred documentation and evidence of an ID tag or tattoo that matches the registered purebred documentation for the predated animal. Parental registration documents will be accepted if additional documentation is provided demonstrating a genetic link between the predated calf and the registered parents.

Sheep and Goats

Registered purebred sheep and goats will be compensated at two times the FMV set out in standardized valuation tables, up to the maximum compensation value for registered sheep and goats (see Maximum Compensation Values in these program guidelines).

Required Documentation: The owner must provide registered purebred documentation and evidence of an ID tag or tattoo that matches the registered purebred documentation for the predated animal. Parental registration documents will be accepted if additional documentation is provided demonstrating a genetic link between the predated lamb or kid and the registered parents.

Pregnant Cattle, Sheep and Goats

Cattle

Pregnant cattle will be compensated at one-and-a-half times the FMV set out in standardized valuation tables, up to the maximum compensation value for unregistered cattle (see section Maximum Compensation Values in these program guidelines).

Required Documentation: The owner must provide breeding records for the predated animal. The submitted records must contain the following information to be eligible:

- ID (animal or group)

- Insemination date (if applicable)
- Date exposed to bull
- Estimated calving date
- Confirmation of pregnancy date

Sheep and Goats

Pregnant ewes and does will receive \$70 per ewe or doe, in addition to the FMV set out in standardized valuation tables, and up to the maximum compensation value for unregistered sheep or goat (see section Maximum Compensation Values in these program guidelines).

Required Documentation: The owner must provide an ultrasound report or breeding records for the predated animal. Submitted records must contain the following information to be eligible:

- ID (animal or group)
- Number of ewes or does (if applicable)
- Ram or buck ID (animal or group)
- Dates rams or bucks went in and came out
- Estimated lambing or kidding date

Breeding Poultry

Breeding stock values are factored into standardized valuation tables found at www.Ontario.ca/predation.

Required Documentation: The owner must provide sales receipts demonstrating the majority of the flock was sold to breeders and proof of pedigree from a breeder company to support grandparent, great-grandparent, foundation and pedigree stock claims.

Other Breeding Livestock

Premiums may be considered for other types of breeding livestock if the owner submits breeding records or equivalent documentation and receipts (issued within the last 18 months) with his or her application.

Ineligible Premium Claims

Flock damage is not eligible for compensation under the program.

Receiving Payment

OMAFRA will provide a written decision letter to the owner notifying him or her of the application assessment results, including any compensation value assigned. If an appeal is not requested, the municipality will receive notification of the assigned compensation value 20 business days after the date of the original decision letter. Payment will then be released by the municipality to the owner. OMAFRA will reimburse the municipality for the assigned compensation value indicated in the notification letter. An administrative allowance of \$30 per application will also be provided by OMAFRA to municipalities to assist with application processing costs. Payments to beekeepers and those in a territory without a municipal organization will come directly from the OMAFRA.

If requested by the local municipality or OMAFRA, owners must provide either a Canada Revenue Agency business number or a Social Insurance Number (SIN) before compensation can be issued.

Compensation payable under the program is taxable income.

- Municipalities/OMAFRA are required to complete and issue a Statement of Farm Support Payment (AGR-1 form) at the end of a given calendar year to all owners who received compensation, in compliance with CRA requirements.
- Municipalities/OMAFRA must submit the AGR-1SUM Return of Farm-Support Payment to the CRA.

Appeals

OMAFRA will provide written notification to the owner and the municipality of the application assessment results, including any compensation value assigned. If an owner does not agree with the written results of his or her assessed application, he or she may request, in writing, an appeal of the decision. A written request for an appeal must be received by the program administrator within 20 business days of the date indicated on the notification letter. A fee of \$25, in the form of a cheque or money order payable to "Minister of Finance," is also required to process the appeal request; however, the fee will be refunded if the director makes a decision that favours the owner's position.

How to Request an Appeal

Send a letter to:

Ontario Ministry of Agriculture, Food and Rural Affairs
Attention: OWDCP Program Administrator
Rural Programs Branch
1 Stone Road West, 4th floor NW
Guelph, ON N1G 4Y2

- Identify the application by the application number contained in the decision letter and the date of the letter contained therein.
- Indicate that you wish to appeal the outcome of the application.
- Indicate in the letter your reason(s) for appealing.
- Provide any additional evidence to substantiate your reason(s) for appealing.
- Include the \$25 fee payable to "Minister of Finance" (cheque or money order).

The director of appeals will conduct a comprehensive re-valuation of the claim and respond within 20 business days of receiving the appeal. The director may adjust compensation awarded by the program administrator, either higher or lower, or deny the claim. The director will provide a copy of the decision to the owner, the program administrator and the respective municipality.

Reasonable Care

As an eligibility requirement, owners must have implemented reasonable care measures to prevent predation on the property where the kill/injury occurred. Owners must be capable of identifying all investments, retained services and farm management practices that have been employed over time to mitigate predation. If consistent predation is occurring, a scalable prevention plan should be implemented. Owners must also be in compliance with all dead livestock disposal regulations.

A reasonable care plan is required for owners who have already submitted five applications in a given calendar year (January 1 to December 31). This plan requires owners to identify all implemented and planned investments, services retained and farm management practices employed to mitigate predation on their farm premises (or multiple premises). Owners must employ or plan to employ predation prevention measures that are reasonably in proportion to the predation they have experienced. Planned reasonable care measures, which have been indicated on a reasonable care plan, must be implemented by the owner within a practical period of time. Alternatively, a biosecurity plan may be submitted in the place of a reasonable care plan, so long as it incorporates a predator entry control component.

All reasonable care plans (or biosecurity plans) are reviewed and assessed by OMAFRA. Where a plan is required, all applications will be deemed ineligible until the requested plan is submitted and reviewed.

The completed reasonable care plan (or biosecurity plan) should be sent directly to the program administrator by email (wildlife.damage@ontario.ca) or by mail:

Ontario Ministry of Agriculture, Food and Rural Affairs
Attention: Program Administrator, OWDCP
Rural Programs Branch
1 Stone Road West, 4th Floor NW
Guelph, ON N1G 4Y2

OMAFRA will send a reasonable care plan template to owners at the time a fifth application is processed. The template is also available at www.ontario.ca/predation.

Enforcement of Animal Cruelty Laws

In circumstances where OMAFRA is concerned with the well-being of farm animals, the Ontario Society for the Prevention of Cruelty to Animals (OSPCA) may be contacted. Empowered by the *Ontario Society for the Prevention of Cruelty to Animals Act*, inspectors and agents of the OSPCA relieve animal suffering and distress by issuing orders, removing animals and laying charges under the *Criminal Code* of Canada and the *Ontario Society for the Prevention of Cruelty to Animals Act* where circumstances warrant. Under the act, inspectors and agents have the same authority as police officers when enforcing animal cruelty laws.

Ontario Farm Animal Care Helpline Services: This helpline can provide assistance to farmers (of beef cattle, dairy cattle, pigs, rabbits, chickens and turkeys) who are unwilling or unable to maintain acceptable conditions for their farm animals (or if you are a farmer experiencing difficulties) and concerns will be relayed to the appropriate group. The phone number is 519-837-1326. More information can be found online at www.farmfoodcareon.org.

Maximum Compensation Values

Species	Maximum Amount (\$) Per Unit
Alpaca	8,000
Bison bull, one year and older	4,000
Bison, all other	2,500
Cattle, registered	8,000
Cattle, non-registered	4,000
Deer Buck, one year and older	8,000
Deer, all other	4,000
Donkey	5,000
Elk Bull, one year and older	8,000
Elk, all other	4,000
Emu	500
Fox	1,500
Fisher	250
Goat, non-registered	600
Goat, registered	1,000
Horse	8,000
Llama	8,000
Lynx	2,000
Marten	250
Mink	150
Mule	5,000
Ostrich	3,000
Rabbit Breeders, for meat production	40
Rabbit ,all other	30
Raccoon	75
Rhea	1,500
Sheep, registered	1,200
Sheep, non-registered	500
Swine, registered	5,000

Swine, non-registered	2,000
-----------------------	-------

Species	Maximum Amount (\$)
Chicken, for egg production	30
Chicken, parent breeder for egg production	60
Chicken, parent breeder for meat production	60
Chicken, grandparent breeder for egg production	120
Chicken, grandparent breeder for meat production	100
Chicken, all other	20
Chicken, primary breeder foundation stock	1,200
Goose, for meat production	40
Goose, parent breeder	100
Goose, grandparent breeder	300
Turkey, for meat production	70
Turkey, parent breeder	250
Turkey, grandparent breeder	700
Turkey, primary breeder foundation stock	1,050
Duck, for meat production	28
Duck, for egg production	60
Duck, parent breeder	85
Duck, grandparent breeder	250
Bobwhite, northern Grouse, ruffed Grouse, sharp-tailed Grouse, spruce Partridge, gray (Hungarian) Pheasant, ring-necked Ptarmigan, rock Ptarmigan, willow Turkey, wild These species are game birds pursuant to a license under Schedule 3 of the <i>Fish and Wildlife Conservation Act, 1997</i> .	500

Determining Beehive, Bee Colony and Beehive-related Equipment Values

The bee investigator will determine the FMV of damaged beehive, bee colony or beehive-related equipment and use that to calculate the value of a claim under this program.

The maximum compensation for a bee colony is \$150.

The maximum compensation for beehive-related equipment is \$100.

Program Definitions

Note that the definitions below appear in upper and lower case throughout the document.

“**Beehive**” means the habitation or dwelling place constructed for a bee colony.

“**Bee colony**” means a colony of bees maintained for the production of honey.

“**Beehive-related equipment**” means equipment normally associated with operating a beehive.

“**Bee investigator**” means a person or persons appointed by the Minister to act as an investigator for the purposes of determining damage to beehives, bee colonies and/or beehive-related equipment under the program.

“**Biosecurity plan**” means documented management strategies developed to prevent the entry and spread of disease.

“**Business day**” means any working day, Monday to Friday inclusive, but excluding statutory and other holidays on which the Government of Ontario has elected to be closed for business.

“**Damage**” means the partial destruction of beehive-related equipment and construction materials normally associated with operating a beehive.

“**Director**” means an individual appointed by the minister to hear appeals under the program.

“**Fair market value**” or “**FMV**” means the average value an owner might receive for an animal with specific characteristics, such as age and weight. In most cases this will be represented by the standardized compensation rates provided by OMAFRA.

“**Farm Business Registration Number**” or “**FBRN**” means the registration number that farm operations with a gross farm income of \$7,000 or more are required to acquire under the *Farm Registration and Farm Organizations Funding Act*.

“**Injured**” in respect to livestock or poultry means physically wounded.

“**Injury**” has a corresponding meaning to injured.

“**Livestock**” includes mammals kept or raised on a farm for agricultural purposes and that are designated by the minister in section Eligible Livestock Species of these program guidelines.

“**Minister**” means the Minister of Agriculture, Food and Rural Affairs or such other minister who may be designated from time to time as the responsible minister in relation to the *Ministry of Agriculture, Food and Rural Affairs Act* or

the program, as the case may be, in accordance with the *Executive Council Act* or any other act of the Ontario legislature that allows another minister to be designated as the responsible minister, unless the context indicates otherwise.

“Ministry” means the Ministry of Agriculture, Food and Rural Affairs or such other ministry that has been designated as being responsible for this program, unless the context indicates otherwise.

“Municipal investigator” means a person or persons appointed by a municipality to investigate injury or death to livestock and/or poultry caused by wildlife as set out in section 7(6) of the *Ministry of Agriculture, Food and Rural Affairs Act*.

“OIC” means the Order in Council 502/2016.

“Owner” means a person who owns the livestock and/or poultry that has been injured or killed as a result of wildlife or whose beehives, bee colonies and/or beehive-related equipment has been damaged as a result of wildlife; they are the applicant to the program, and the person to whom a taxable income receipt is issued.

“Ontario Regulation 106/09” means Ontario Regulation 106/09 - Disposal of Dead Farm Animals, as amended, made under the *Nutrient Management Act, 2002, S.O. 2002, c. 4, as amended*.

“Person” for the purposes of this program guideline includes an individual, sole proprietor, corporation, partnership and unincorporated association.

“Plan” means a reasonable care plan.

“Poultry” includes domesticated fowl kept or raised on a farm for agricultural purposes and that are designated by the minister in the section Eligible Livestock Species of these program guidelines.

“Premises identification” means the assignment of one unique premises identification number based on national standards to a single land parcel that has been registered, characterized and validated.

“Program administrator” means an individual appointed by the minister for the purposes of administering the program.

“Program” means the Ontario Wildlife Damage Compensation Program.

“Program guidelines” means any written documents setting out the criteria governing the operation of the program and posted to the ministry's website.

“Reasonable care” means predation prevention measures, which align with livestock, poultry or honey bee industry best management practices, have been implemented by the producer on the property where predation occurred.

“Registered livestock” means livestock that are registered with the appropriate breeding association for that species of livestock.

“Sufficient evidence” means evidence which allows the municipal investigator and the program administrator to determine that a predator was the primary cause of death/injury to healthy livestock and that the predator involved is eligible under the program guidelines. Photographic evidence of each carcass is required.

“Territory without municipal organization investigator” means a person or persons appointed by the minister to act as investigator for territories without municipal organization for the purposes of this program.

“Wildlife” means undomesticated animals as designated by the Minister as outlined in the section Eligible Wildlife Species within these program guidelines.

APPENDICES

Appendix A – Steps to Take If You Suspect Your Livestock or Poultry are Injured or Killed by Wildlife

- Notify your local municipality within 48 hours of discovering the injury or death of your livestock or poultry. If you are located in a territory without a municipal organization, call OMAFRA at 1-877-424-1300 to contact the territorial investigator.
- **Seek veterinary care:** If an animal sustained an injury, immediately seek veterinary care or other humane treatment options to prevent further suffering. Veterinary care costs are eligible under this program up to the FMV of the livestock. All receipts and invoices should be saved and submitted with the application.
- **Preserve the injury/kill site:** Do not move, destroy or dispose of the carcass(es) or injury/kill-site evidence until the municipal or territorial investigator has investigated and agrees it/they can be destroyed or disposed of. An exception will be made if this contravenes Ontario Regulation 106/09 of the *Nutrient Management Act, 2002*.
 - Suggested methods of preserving the site include avoid walking in or around the area, placing a tarp over the carcass(es), adding lime around the site, and taking photos of the injuries/carcass(es) and scene.
- As part of the application process, the following information will be required to complete a claim:
 - A valid FBRN, approved documentation confirming an FBRN exemption, or a confirmation letter provided by the Indian Agricultural Program of Ontario (IAPO).
 - A valid premises identification (PID) number for the site where the kill or damage occurred or a confirmation letter provided by the Indian Agriculture Program of Ontario (IAPO).
 - Owner signature on the application certifying the information provided is true and accurate to the best of his or her knowledge.
 - Indicate on the application whether you wish to provide additional evidence and/or documentation.

Appendix B – Steps to Take If You Suspect Your Bee Colonies, Beehives and/or Beehive-related Equipment Have Been Damaged By Wildlife

- Notify either OMAFRA (1-877-424-1300) or the bee investigator within two business days of discovering the damage to beehive, bee colony or beehive-related equipment.
- **Preserve the site:** Do not move, destroy or dispose of the beehive, bee colonies or beehive-related equipment until the bee investigator has seen the evidence and agrees it can be destroyed or disposed of.
 - Suggested methods of preserving the site include avoid walking in or around the area, placing a tarp over the damaged equipment, and taking photos of the scene.
- As part of the application process, the following information will be required:
 - A valid beekeeper ID registered under the *Bees Act*.
 - A Canada Revenue Agency business number. Compensation received under the program is considered taxable income by Canada Revenue Agency. OMAFRA will issue Statement of Farm Support Payments (AGR1) for income tax purposes.
 - Owner signature on the application certifying the information provided is true and accurate to the best of his or her knowledge.
 - Indicate if you will be submitting additional evidence relevant to the application assessment and valuation process.

Appendix C - Completing an Application for the Livestock or Poultry Owner

The municipal or territorial investigator must complete a program application within 72 hours of being notified of a kill or injury. The municipal or territorial investigator must record all evidence collected through the investigation as well as any information provided by the owner. It is the program application and any additional relevant documentation provided by the owner that will be used by the program administrator to assess the eligibility of the application and the value of the compensation for the damages.

All sections of the program application form (steps one to ten) must be completed. If OMAFRA receives an incomplete application, the municipality will be informed and given 15 business days to provide the necessary information. Incomplete applications will be declined after this period.

Step 1 – Owner Identification and Basic Eligibility Requirements (to be completed by owner)

- Contact information for the livestock or poultry owner.
- Owner's business number
 - The Canada Revenue Agency (CRA) business number should correspond to the one used to declare the owner's farming income to the CRA. If the owner does not have a CRA number and compensation for damages is approved, a social insurance number (SIN) must be provided to the municipality and/or OMAFRA upon request, for income tax purposes.

Canada Revenue Agency Business Number: a nine-digit business identifier used in Canada to which clients can register program accounts with the CRA. The program account number consists of three parts: the business number, the two-letter program identifier, and the four-digit reference number. Visit this website for more information: www.cra-arc.gc.ca/E/pub/tg/rc2/README.html.

- A valid FBRN associated with the owner:
 - An FBRN is a six- to seven-digit number and identifies farm businesses that have declared gross farm income of \$7,000 or more for income tax purposes. Farm businesses are required by legislation to register each year for an FBRN with Agricorp at 1-888-247-4999. There is an annual fee.
 - The owner may qualify for an exemption from the FBRN. Acceptable exemptions include:
 - Religious Exemption: Requires a copy of the religious exemption letter as provided by the Agriculture, Food and Rural Affairs Appeal Tribunal (AFRAAT).
 - Cultural Exemption for First Nations producers: requires a letter from the Indian Agriculture Program of Ontario (IAPO) verifying the farm business operates in the First Nations community.
 - Gross Farm Income Exemption Certificate: granted by OMAFRA.
- Premises identification (PID) number:
 - A PID number is a unique identifying number assigned to a parcel of land that is the site of the injury or kill location.
 - PID numbers begin with "ON," followed by seven (7) digits.
 - It's free and quick to obtain a PID number. Visit www.ontarioppr.com or call 1-855-697-7743.

Municipal or Territorial Investigator Report

Step 2 – Investigator Information

- Contact information for the municipal/territorial investigator.

Step 3 – Description of Damages Incurred

A) Indicate the type of damages being reported and the date on which the incident occurred.

B) Describe the injuries

- Include a description of the injuries and/or wounds sustained (includes evidence of bite marks, wounds, lacerations, bleeding, bruising, position of carcass, etc.).
- Describe the location where the incident occurred and any evidence of a predatory struggle (includes blood splatters and trails, drag marks, torn-up earth or vegetation, etc.).
- Attach additional sheet(s) if needed.

C) Photos

- Provide three to six digital colour photos per individual livestock or poultry.
- Include photos of the injuries and/or wounds sustained (e.g., bite marks, wounds, lacerations, bleeding, bruising, etc.).
- Photos of the location where the incident occurred are also required including any evidence of a predatory struggle (e.g., blood splatters and trails, drag marks, torn-up earth or vegetation, etc.).
- Additional photos taken by the owner, if they are colour and relevant to the incident, can be submitted as supplementary evidence and should be labelled as being taken by the owner.

Step 4 – Description of Predator

- Identify the wildlife species.
- Outline site evidence to support wildlife identification (e.g., tracks, killing wounds, damages incurred).

Step 5 – Description of Injured or Killed Species

The information reported in the table will be used to calculate the value of the predated animal. The municipal/territorial investigator must include:

- Quantity of head/poultry
- Sex
- Species type (one per row)
- Estimated live weight (one weight per row)
- Age
- Premium (if applicable)
- Investigator declaration: indicate whether sufficient evidence has been found to determine that the livestock or poultry death/injury was caused by wildlife.
- Evidence of predation:
 - Indicate if the carcass(es) or injured animal(s) being claimed is/are on site and can be directly assessed.
 - indicate if the available evidence meets OMAFRA's minimum standards of evidence by checking the applicable boxes provided.

Request for premiums: owners may request a premium if they possess the required supporting documentation, such as breeding records or registration documents, to substantiate their request (see section Assigning Compensation in these program guidelines). Please indicate which premium is being applied for and provide the required documentation to support the premium.

Step 6 – Reasonable Care

The following information will be used to assess whether reasonable efforts have been taken to prevent the incidence(s) of injury or death of livestock or poultry:

- Herd/flock size
- Health condition of herd/flock
- Breeding season
- Dead livestock disposal practices
- Livestock inspection frequency
- Fencing type and condition
- Presence of a guard animal
- Investigators findings regarding reasonable care

After receiving five applications within one calendar year (January 1 to December 31), OMAFRA will require a detailed reasonable care plan (or biosecurity plan) be submitted and reviewed in order for future claims to be considered complete and eligible. Please use the following link for the reasonable care plan template: www.ontario.ca/predation.

Step 7 – Municipal Investigator Declaration and Signature

The municipal or territorial investigator must make a declaration as to the findings of their investigation. The signature of the investigator is also required.

Step 8 – Livestock or Poultry Owner Declaration and Signature

The owner must agree to the terms and conditions of the program and attest to the information contained in the application by signing the application. As part of step eight, the owner must also indicate whether the owner wishes to provide additional evidence.

Additional evidence or documentation must support the evidence provided by the municipal investigator and be submitted directly to the municipality within seven business day of the municipal investigator visiting the kill/injury site. Relevant third-party-issued documentation will be accepted as additional evidence. Acceptable evidence may include photos, purebred documentation (certificate of registration), veterinary reports and paid receipts, breeding records (or equivalent documentation), pregnancy scanning data, and sales receipts for other breeding livestock not captured in the standardized valuation tables.

Owners from territories without a municipal organization may submit additional evidence to the territorial investigator who will provide it to the program administrator or via email (wildlife.damage@ontario.ca) or mail:

Ontario Ministry of Agriculture, Food and Rural Affairs
Attention: OWDCP Program Administrator
1 Stone Road West, 4th Floor NW
Guelph, ON N1G 4Y2

Step 9 - Submitting the Program Application (To be completed by Municipal Official)

The municipal clerk or territorial investigator in the case of territories without a municipal organization will review the application and ensure the following:

- The application is complete.
- The municipal investigator and the owner have signed the application.
- All required supporting documentation has been provided (e.g., three to six colour photos of each animal, purebred documentation).
- If the owner indicated in step eight that they wished to provide additional evidence, and that evidence was provided within seven business days of the investigation, it has been included.

All claims are to be submitted to OMAFRA via email (wildlife.damage@ontario.ca) or mail:

Ontario Ministry of Agriculture, Food and Rural Affairs

Attention: OWDCP Program Administrator

1 Stone Road West, 4th Floor NW

Guelph, ON N1G 4Y2

Step 10 – Municipal Declaration and Signature

If applicable, the municipal clerk must review and certify that the information provided in the application form is true and accurate to the best of his or her knowledge. This step is not required in unorganized territories.

Appendix D – Completing an Application for Beekeepers

The bee investigator must complete an application within two days of being notified of the loss or damages. The bee investigator must record all the evidence collected through the investigation as well as any information provided by the owner. It is the program application, and any additional relevant documentation provided by the owner, that will be used by the program administrator to assess the validity of the application and the value of the compensation for the damages.

All sections of the application (steps one to nine) must be completed. If OMAFRA receives an incomplete application, the bee investigator will be informed and given 15 business days to provide the necessary information. Incomplete applications will be declined after this period.

Step 1 – Beekeeper Identification & Basic Eligibility Requirements (To be completed by owner)

- Contact information for the beekeeper.
- Owner's business number:
 - The CRA business number should correspond to one used to declare the owner's farming income to CRA. If the owner does not have a CRA number and is approved for funding, a Social Insurance Number (SIN) must be sent to OMAFRA for income tax purposes.

Canada Revenue Agency Client Number: a nine-digit business identifier used in Canada to which clients can register program accounts with the CRA. The program account number consists of three parts: the business number, the two-letter program identifier, and the four-digit reference number. For more information, visit www.cra-arc.gc.ca/E/pub/tg/rc2/README.html.

- A valid FBRN associated with the owner:
 - An FBRN is a six- to seven-digit number that identifies farm businesses that have declared gross farm income of \$7,000 or more for income tax purposes. Farm businesses are required by legislation to register each year for an FBRN with AgriCorp by calling 1-888-247-4999. There is an annual fee.
 - You may qualify for an exemption from the FBRN. Acceptable exemptions include:
 - Religious Exemption: requires a copy of the religious exemption letter as provided by the Agriculture, Food and Rural Affairs Appeal Tribunal (AFRAAT).
 - Cultural exemption for First Nations producers: requires a letter from the Indian Agriculture Program of Ontario (IAPO) verifying the farm business operates in the First Nations community.
 - Gross Farm Income Exemption Certificate: granted by OMAFRA.
- Beekeeper ID number:
 - Beekeepers or owners of beekeeping equipment are required by legislation to register each year for a beekeeper ID number. A beekeeper ID number can be obtained by contacting the Provincial Apiarist via mail, fax or email:

Ontario Ministry of Agriculture, Food and Rural Affairs
Animal Health and Welfare branch
1 Stone Road West, 5th Floor NW

Guelph, ON N1G 4Y2
Fax: 519-826-4375
E-mail: apiary@ontario.ca

- Premises identification number
 - A premises identification (PID) number is a unique identifying number assigned to a parcel of land that is the site of the injury or kill location. PID numbers begin with "ON," followed by seven digits
 - It's free and quick to obtain a Premises ID. Visit the following website www.ontariopr.com or call 1-855-697-7743 for more information.

Bee Investigator Report

Step 2 – Bee Investigator Information

- Contact information for the bee investigator.

Step 3 – Description of Bee Colony, Hive and Equipment Damages

A) Indicate which aspect of the operation sustained the damages.

B) Describe the damages:

- Indicate the type of damages incurred
- Indicate the date the damage/destruction occurred

C) Photos

- Provide three to six digital colour photos per damaged beehive, bee colony, or piece of beehive-related equipment.
- Include photos that show the relevant surroundings of where the damage occurred (e.g., fencing, attack site and structures).
- Additional photos taken by owner, if they are colour and relevant to the incident, can be submitted as supplementary evidence.

D) Declaration by the bee investigator

- The bee investigator must assess whether sufficient evidence exists to determine that the beehive, bee colony or beehive-related equipment was damaged due to wildlife.

Step 4 – Data Collection

The information reported in the table will be used to calculate the value of the damage incurred. The bee investigator must assess:

- The value of the beehive and beehive-related equipment damages
- The number of bee colonies damaged
- The value of the bee colonies damaged
- The total compensation that can be applied for

Step 5 – Description of Predator

- Identify the wildlife species.
- Outline site evidence to support wildlife identification (e.g., tracks, droppings, type of damages).

Step 6 – Reasonable Care

The following information is required and will be used to assess whether reasonable efforts have been taken to prevent the incidence(s) of damage to the beehive, bee colony or beehive-related equipment:

- Total number of bee yards managed
- Total number of active beehives (in this yard)
- Bee yard inspection frequency
- Health condition of bee colonies
- Investigators assessment regarding reasonable care

Step 7 – Beekeeper Declaration and Signature

The owner must agree to the terms and conditions of the program and attest to the information contained in the application by signing the application. The owner must also indicate whether or not they wish to provide additional evidence (e.g., photos taken by the owner or proof of payment for bee equipment). Additional evidence or documentation must support the evidence provided by the bee investigator and be provided within seven business days of the bee investigator visiting the kill/injury site. If the owner chooses to provide additional evidence, it must be sent directly to the program administrator via email (wildlife.damage@ontario.ca) or mail:

OWDCP Program Administrator
Ontario Ministry of Agriculture, Food and Rural Affairs
1 Stone Road West, 4th Floor NW
Guelph, ON N1G 4Y2

Step 8 - Submitting this Program Application

The bee investigator must review the application and ensure the following:

- The application is complete.
- All required supporting documentation has been provided (e.g., three to six colour photos of each colony or damaged bee equipment).
- The bee investigator and the owner have signed the application.

All claims are to be submitted to OMAFRA at the following email address: wildlife.damage@ontario.ca.

Step 9 – Bee Investigator Declaration and Signature

The bee investigator must certify that the information provided in the application form is true and accurate to the best of their knowledge. The bee investigator must also sign the application.

Ontario Wildlife Damage Compensation Reasonable Care Plan

Owner Identification

Owner Last Name	Owner First Name
Business / Farm Business Name	

Owner Business Address

Unit No	Street No	Street Name	Rural Route	PO Box
Email Address			Telephone Number	
City/Town			Province ON	Postal Code

Basic Eligibility Requirements

Farm Business Registration Number (FBRN):

--	--	--	--	--	--	--

OR, if the business does not have an FBRN:

I do not have an FBRN number, but have qualified for an exemption

Location(s) where Care Measures have been implemented or are planned to be

implemented. Premises Identification Number:

O	N							
----------	----------	--	--	--	--	--	--	--

If there are multiple premises, include additional Premises Identification Numbers:

Complete the following Reasonable Care Plan and submit it to the Administrator of the Ontario Wildlife Damage Compensation Program (OWDCP). Completion of this document is mandatory and will determine program eligibility. Please refer to the OWDCP Guidelines for further information on reasonable care and preventive measures.

OMAFRA extension staff may be in contact with you to connect you with resources, or clarify aspects of your plan.

Current Care Measures

	WERE PREVENTATIVE MEASURES EMPLOYED?	WHAT PREDATION PREVENTION MEASURES WERE EMPLOYED?	DATE OF EMPLOYMENT
<p>FARM MANAGEMENT PRACTICES</p> <p>(E.g. Frequency of herd/ flock visits)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		
<p>INVESTMENTS</p> <p>(E.g. electric net fencing)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		
<p>SERVICES RETAINED</p> <p>(E.g. Retains the services of a hunter licenced)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		

Planned Care Measures that You (the Livestock Owner) Intend to Implement

	WILL FURTHER MEASURES BE EMPLOYED?	WHAT PREDATION PREVENTION MEASURES WILL BE EMPLOYED?	WILL BE EMPLOYED BY:
<p style="text-align: center;">FARM MANAGEMENT PRACTICE CHANGES</p> <p>(E.g. Frequency of herd/ flock visits)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		
<p style="text-align: center;">ADDITIONAL INVESTMENTS</p> <p>(E.g. electric net fencing)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		
<p style="text-align: center;">ADDITIONAL SERVICES RETAINED</p> <p>(E.g. Retains the services of a hunter licenced)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No		

I intend to implement these planned predation mitigation measures and/ or current measures are reasonable and adequate for this production environment.

*Please note additional pages may be attached and submitted with this form.

I attest that all of the information I have provided is true and accurate to the best of my knowledge.
