

## GEORGINA

Dec. 16, 2021

### Notice to residents

#### Cockburn subdivision watermain improvements

Dear resident,

The Town of Georgina has retained The Municipal Infrastructure Group Ltd. (TMIG), to undertake the design of the Cockburn subdivision watermain improvements. The design phase is anticipated to be completed mid 2022, with construction anticipated to start late 2022.

The Town has identified the need for the project to address taste, odour and discolouration issues. The project study area includes the watermains along Faircrest Avenue, Grew Boulevard, O'Connor Drive, Meadowlea Avenue and Sunnidale Boulevard.

During the design phase, there will be various site visits and field studies including surveying, utility locates, geotechnical drilling, and hydrogeological investigations. Due to the nature of the work, there may be some temporary noise and dust from the equipment and trucks; however, every effort will be made to reduce disturbances.

Thank you for your patience while we undertake the design phase of the project.

If you have questions about the upcoming work, please contact one of the following project team members or visit the Town's webpage at [georgina.ca/CockburnWatermain](http://georgina.ca/CockburnWatermain).
