Notice of Study Commencement Town of Georgina Sanitary Sewer Model and Master Plan Municipal Class Environment Assessment

The Town of Georgina has initiated a sanitary master plan to evaluate existing wastewater infrastructure and determine its capacity to accommodate population growth. This sanitary master plan will also support capital improvement programs and assist with preparing a development charge by-law.

The process

This study is being done in accordance with Approach #1 of the master planning process as set out in the Municipal Class Environmental Assessment (EA) (October 2000, as amended in 2007, 2011 and 2015), which is an approved process under the Ontario Environmental Assessment Act. This approach involves the preparation of a master study document at the conclusion of phases 1 and 2 of the Class EA process.

Consultation

The Town of Georgina encourages the public and stakeholders to participate in this planning process. The Town will be hosting a Public Information Centre (PIC) this fall to obtain input on the preliminary preferred servicing

strategies for wastewater. Notification will be advertised in the local community newspaper and notices will be mailed to stakeholders. Additional project information is located on the Town's website at:

georgina.ca/SanitaryMasterPlan

Upon completion of the study, a project file report documenting the study process, will be prepared and made available for public review and comment.

If you have any questions, comments, or wish to be notified about future study activities, please contact Carol Liu or Julien Bell.
